

Dehumidifying Dryer **MEDICAL**

Dew point and temperature logging with our “Data Log” module

Characteristics:

- ▶ Dew point logging
- ▶ Temperature logging
- ▶ Processor-controlled and battery-buffered data
- ▶ User-definable sampling intervals
- ▶ Read-out of memory with standard PC running MS Windows®
- ▶ Data preparation for graphical display or for transfer to spreadsheet programs

The logging of dew point and temperature in the drying bin is already delivery standard in the MEDICAL dryer series by Amboss+Langbein.

Characteristics of the MEDICAL Dryer Series

Removable seal for
cleaning

Large fill and
sampling entry point

Removable lid

Removable front panel

Fixing clip for removing
the heat conductor

Air intake combined
with heating element

Entire 200 l drying bin and heat
conductor made of stainless steel
(V2A, V4A).

Removable drying bin for extremely
fast material change and easy
cleaning.

Drying capacity: approx. 35 kg PA/h

Total station capacity:
approx. 70 kg PA/h
